

Let our design, engineering and manufacturing experts help invigorate your environment

Boston Group, founded in 1937, offers the very latest in design and manufacturing to turn your projects around quickly from concept to finished solutions.

Integrated Solutions Philosophy

Boston Group designs and manufactures fixtures that bundle a variety of core materials (metal, wood, plastic, power, lighting and technology) into a modular design that allows seamless integration into any environment. Ingenuity Applied!

Cutting edge capabilities

To stay competitive, Boston Group continuously invests in its manufacturing capabilities to provide value driven solutions, quickly and efficiently.

Insight and thoughtfulness

Our people make it all happen. To make a project viable, we formulate cross-functional teams comprising of account managers, designers, purchasers, manufacturing engineers and customers service support.

Experience with energy

The philosophy of Boston Group is to generate true value for our customers. We take time to understand your goals and objectives and apply our extensive experience to create configurable and scalable solutions for your environment.

Challenge us...

At Boston Group, we love a good challenge. We strive to learn and push boundaries, so give us your toughest problem and we'll come up with a solution that meets your needs and budget.

POWER DISTRIBUTION SOLUTIONS

Simply energize your store or any commercial environment with our plug-and-play systems. Our lighting products and modular power systems are easy to use, aesthetic and safe. From creating your specific electrical plan to installation of our manufactured products, we can provide significant efficiency with your power needs.

The wide range of power distribution components allows you to connect all products from Boston Group in the easiest and most cost-effective way. All components are certified and can be connected and disconnected even under load.

FASTLANE® Total Store 'Plug&Play' System

Boston's FastLane® modular wiring solutions are cost-effective 'Plug & Play' wiring methods that carry power and voice/data from electrical and computer patch panels to your selling floor.

Our Fastlane® wiring solutions are custom designed and configured to meet your specific needs while still allowing for a 100% functional, pre-tested modular installation.

The system arrives 'as-designed' to eliminate hard wiring and 'on-the-fly design' common with traditional methods. Save installation time and labor costs with quick, reliable connections from the switch gear to point-of-use.

Our total end to end solution of product and service provides power to all areas of a store: lighting/refrigeration/POS/Service areas.

Currently installed in thousands of retail locations across US, Canada and Mexico.

Power Poles

Boston Group offers a wide range of PowerPole product solutions that fulfill any power/voice and data distribution needs with UL compliant, reliable 'plug & play' connectors.

Boston LED GX

T8 Tubes (IP67) & Spot, Connection cables and Components for rack, shelf and display lighting. GX LED spots can be mounted on surface or recessed.

Powertrack™

Boston PowerTrack™ offers a simple solution for displaying powered fixtures. With a variety of channel lengths and receptacle spacing options, Boston PowerTrack™ can easily be configured to meet your specific display needs. Boston PowerTrack™ is the core electrical element of all Boston Wall, Rack & Gondola Mounted Lighting Displays, Clouds, and more.

VersaPanel®

Boston's VersaPanel® is a versatile merchandising system that powers and displays lighting fixtures. Standard or custom finished face plates include the possibility for power access every 5 cm, both horizontally and vertically:

- Merchandise more in less space. Higher density displays leave more room for merchandise and graphic communications.
- Create a unique selling environment. Free-standing, suspended, wall, pallet racking & gondola platform options.
- Wide range of standard accessories with unlimited possibilities. Integrate duplex outlets, shelving, hooks, graphics and more to display product in their best light.

Mainline® (Europe only)

Mainline® is a track based power supply system with outlets, which can be easily removed, added and repositioned. Ideal for retail outlets, workshops, laboratories and residential properties.

- Versatile
- Modular
- Safe & Certified
- Plug & Play powering
- Pre-assembled components
- Sockets available per country specifications (D, F, UK, AUS etc.)

Certification & Compliance

Every product we make adheres to strict third party national safety standards for mechanical, electrical and environmental compliance.

Integrated Power Applications

Fastlane Plug N Play systems provides power to all areas of store.

Structural Overhead Power Grid Integrates Electrical and Mechanical elements to support the operations of a store

Powered fixture (VersaPanel®) that allows display and illumination

Everything taken care of... Ingenuity Applied!
