

Let our design, engineering and manufacturing experts help invigorate your environment

Boston Group, founded in 1937, offers the very latest in design and manufacturing to turn your projects around quickly from concept to finished solutions.

**Integrated Solutions Philosophy**

Boston Group designs and manufactures fixtures that bundle a variety of core materials (metal, wood, plastic, power, lighting and technology) into a modular design that allows seamless integration into any environment. Ingenuity Applied!

**Cutting edge capabilities**

To stay competitive, Boston Group continuously invests in its manufacturing capabilities to provide value driven solutions, quickly and efficiently.

**Insight and thoughtfulness**

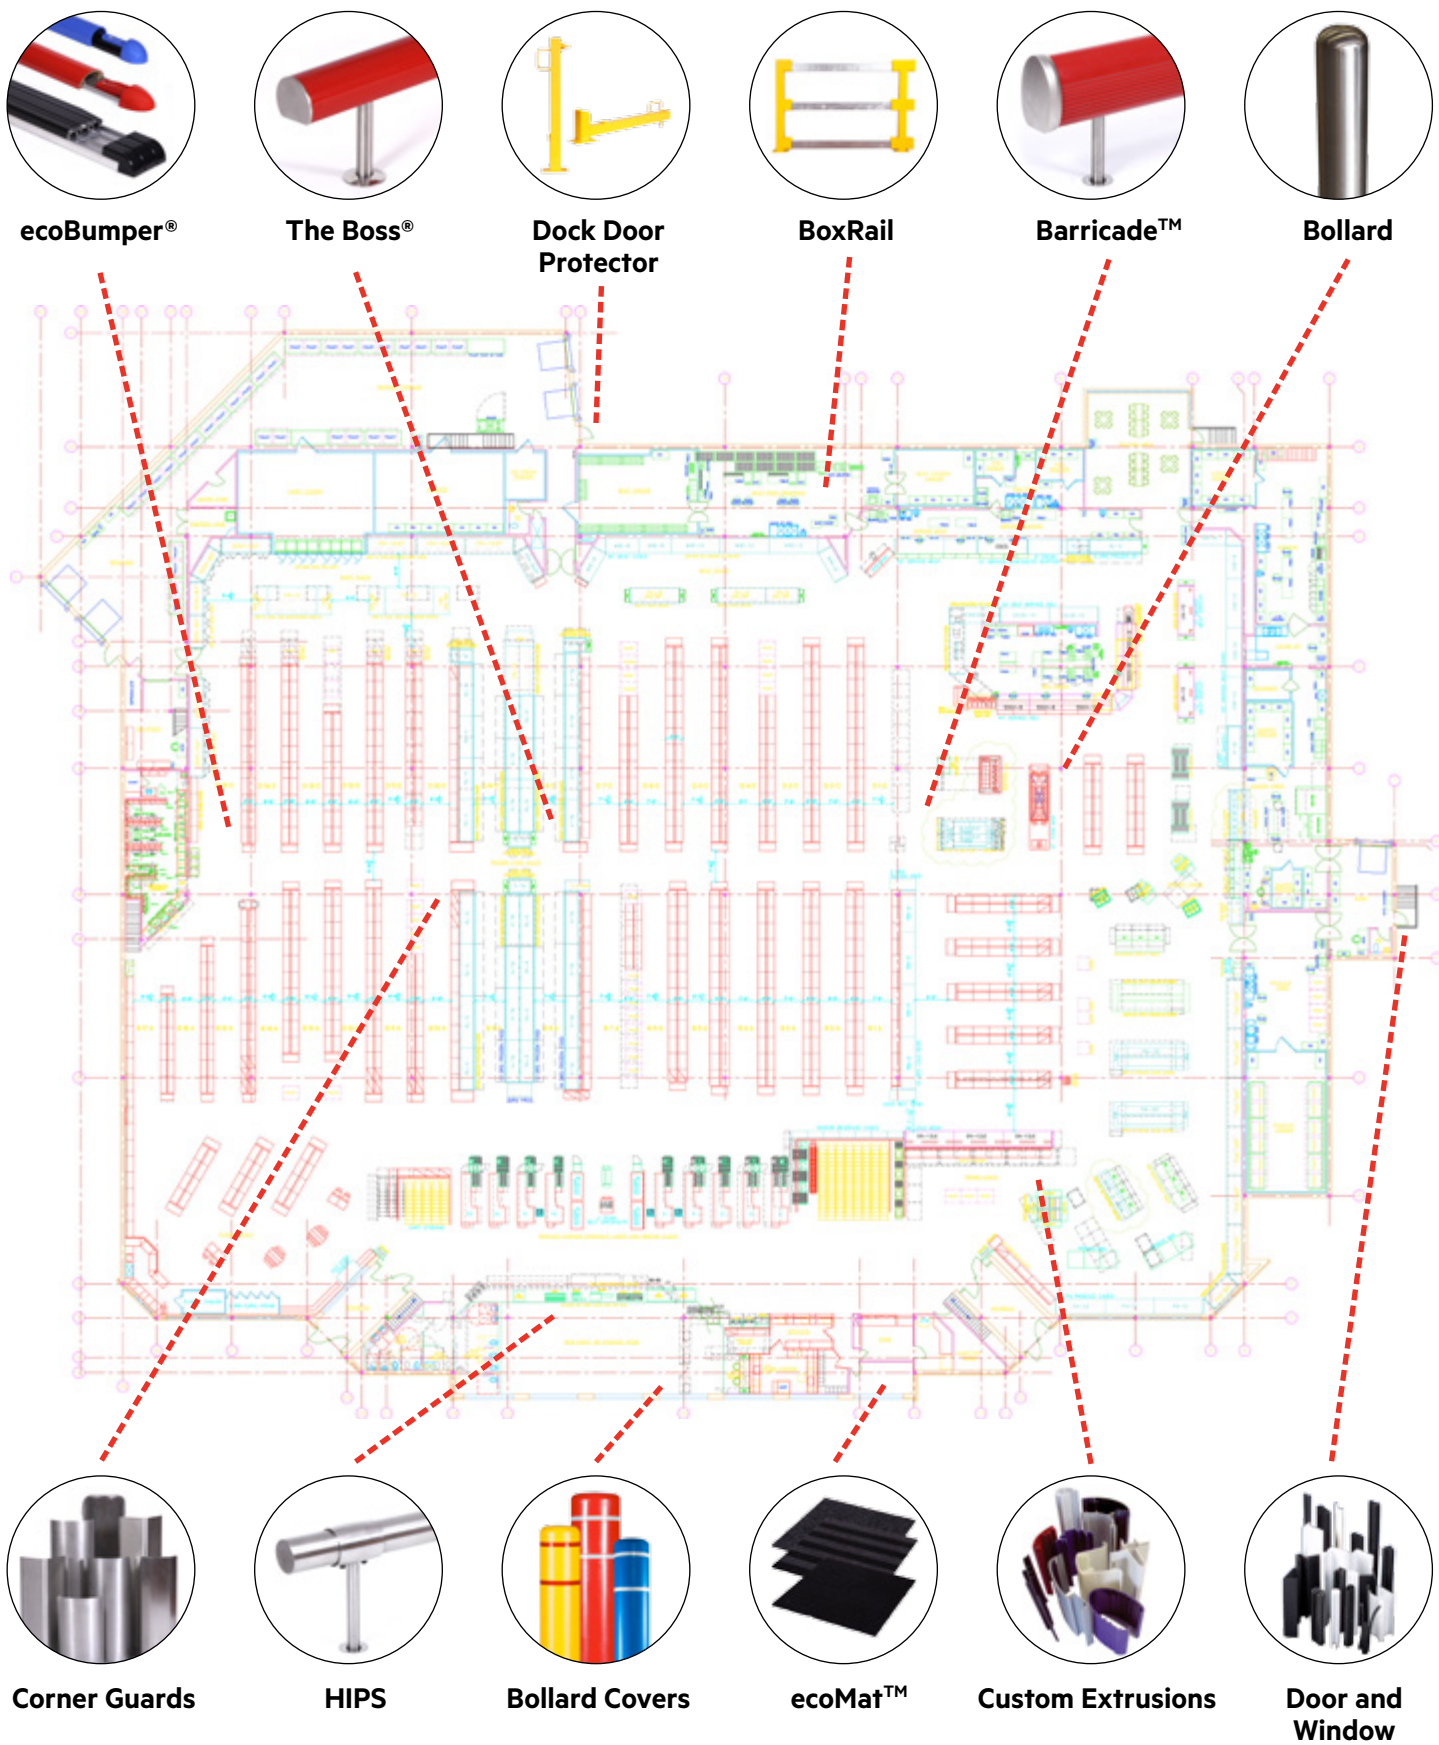

Our people make it all happen. To make a project viable, we formulate cross-functional teams comprising of account managers, designers, purchasers, manufacturing engineers and customers service support.

**Experience with energy**

The philosophy of Boston Group is to generate true value for our customers. We take time to understand your goals and objectives and apply our extensive experience to create configurable and scalable solutions for your environment.

**Challenge us...**

At Boston Group, we love a good challenge. We strive to learn and push boundaries, so give us your toughest problem and we'll come up with a solution that meets your needs and budget.

# ASSET PROTECTION SOLUTIONS

Boston Group bundles its complete floor to ceiling line of asset protection products with outstanding customer service to exceed your protection needs for your environment. **That's Ingenuity Applied.**

For over 80 years Boston Group has set the standard with its full line of bumpers, floor mounted crash rails and entrance matting solutions direct to stores, supply chain partners as well as healthcare and commercial environments.

Our expertise and experience in assessing asset protection needs and prescribing the correct type of manufactured products with top notch survey, service and deployment ensures you get the best quality product and value.

## Production & Manufacturing

We are the original manufacturer. In fact, we invented the category of retail asset protection with the Boston Bumper! Come visit any one of our manufacturing facilities and see how we make our bumpers, end-caps, rails and corner guards. Our doors are always open!

## Deployment & Installation

Our expert customer service and logistics team will deploy your items when and where you need them. Boston Group's experienced staff of engineers and product management are with you every step of the way to supervise and support a seamless installation.

## Assessment & Survey

Our customer centric team of engineers, customer service and account managers will take the time to survey your store environment and traffic patterns to understand what type of asset protection is required.

## Planning

Upon completion of the survey, Boston Group will provide you with:

- A detailed proposal for the right type of protection and placement depending on your operational and environmental needs.
- A complete layout & BOM detailing correct type and placement of asset protection product
- A deployment plan ensuring deliverables are clear and time tables are maintained.

## Certification & Compliance

Every product we make adheres to strict third party national safety standards for mechanical, electrical and environmental compliance.

Boston Group cares about the environment. With over 10 years of being a UL Environment Certified company (the only bumper manufacturer with this certification), we are proud to have placed great emphasis on incorporating recycled material in our product design and manufacture. We are pleased we can report a 15% increase in our year over year usage of post consumer, post industrial content.
