POWER

Ingenuity Applied

Welcome to Boston Group

**We** listen carefully,  
look beyond the challenge and  
come up with smart solutions,  
exploring new domains every  
day together with you. This is  
who we are and what we do.

We call it ingenuity applied.

— **Russell Rubin, CEO**

# At the very beginning

**It all started in the US during the Great Depression in a neighborhood full of immigrants from all over the world where they began a new life and formed new friendships. Just like our founder Irv Rubin, who became part of a group of close friends, calling themselves the triple-three. They grew up together and helped each other out whenever they could.**

In 1937, one of Irv's friends had a local store and needed a better method to handle, prepare and present food and non-food items. So Irv, with the input from his friend, designed, developed and manufactured special fixtures out of metal that met the needs of his friends shop: Boston Metal Products was born.

## Simple Yet Smart

Soon after, Irv founded our first factory in East Boston in 1937, just as the self-service supermarkets were introduced. We stood at the very beginning of this retail revolution. In the 1960s Irv's son Richard joined Boston Metal Products and grew the company nationally with innovative solutions.

One day, when Richard was unloading an order of fixtures, the retailer cautioned him to avoid hitting the walls and expensive refrigeration equipment in the store. Richard then had an idea: asset protection. The Boston Bumper was created. He was the first in the world to come up with this simple yet smart solution.

## Ingenuity Applied

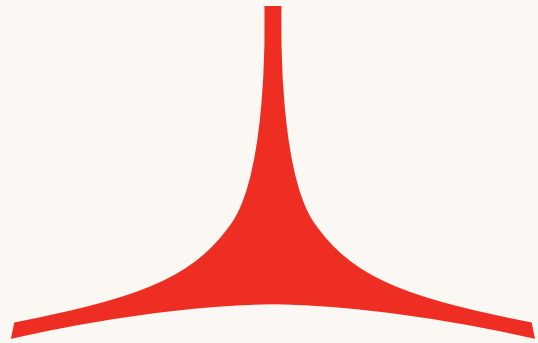

This type of innovative spirit still drives us today. We love to listen to our customers and come up with smart solutions. With our in-house design and state-of-the-art production facilities we can prototype and produce just what you need down to the last detail, whether it's in power, protection or fixtures.

Over the last 80 years we have grown from a regional manufacturer to an international group providing smart solutions to the global retail industry and beyond. All the while our entrepreneurial spirit continues to drive us towards new domains. Irv and Richard applied ingenuity back then. Just like we do today.

**We**  
cherish our  
heritage and at  
the same time  
love to explore  
new domains

# The way we work

**Since 1937 we have helped retail and other institutional clients create service environments designed to fit their needs. We continuously read our customers and keep coming up with smart solutions. Whether it was our first bumper, our power track or our modular power system for self check out cash points.**

There is no one-size-fits-all solution, which is why we work with every client individually to ensure specification, design and manufacture results are achieved. It means that we can focus all of our capabilities on designing and building the best system to serve you.

## Smart from the Heart

Our philosophy is simple: we work smart from the heart. We collaborate with every single client by carefully listening to their needs, speaking their language, asking the right questions and gaining insight from their perspective. We have a restless energy, coming up with ideas and always seeking new challenges and possibilities. This way we cut to the core of our clients' needs. And then: we build exactly that - your need - made possible by our own metal and plastic manufacturing facilities.

## Superior Products

Having our own metal and plastic manufacturing facilities allows us to maintain strict quality controls, adhere to all international standards and deliver a superior product.

In our global manufacturing center of excellence in Ravenna, Ohio, metal, wire and electrical components are designed and manufactured. With an automated production line, a fully staffed tool and die department, and UL-rated electrical assembly, we produce the highest quality products. Coupled with an extensive array of color and powder coating capabilities and you'll understand why we're able to meet virtually any custom design challenge.

In Ohio, we also offer 9 fully automated plastic extruders, 2 injection molding machines, plus in-house tool and die design and development. Whether you're looking for S-shapes, U-shapes or waves, our experienced team can make your idea a reality. In addition, we offer extensive co-extrusion and dual extrusion capabilities. Colors match beautifully because we use only the highest quality resins and polymers. Once your color is calibrated in our system, you can expect consistent, vibrant color matching every time.

## Global Coverage

We offer global coverage 24/7 and work compliant to all international safety, mechanical, electrical and environmental standards.

## Our Team

We are engineers, designers, manufacturers, account managers plus a customer service team - all working as one. For each client we assign a cross-functional team to deliver true value. Give us your toughest problem and we will come up with a solution that meets your needs and budget.

Our team speaks your language. We are culturally mixed, multilingual and understand what you are saying, even between the lines. For almost a century we've been around the block and know our way around.

# Services we provide

## Design & Prototype

**See your imagination come to life**

See your imagination come to life before anything is built. Our advanced simulation software allows you to view your design in isolation or within a larger environment, in any color or finish from any angle. Want to get an actual feel of your design? We can prototype anything with our meticulous metal and plastic machinery, which can produce 1 to 100.000.000 high precision products. This makes any product development accurate, fast and more efficient.

## Manufacturing

**Have it cut, bent and painted**

Whatever is designed can be made to your specifications required. After all, an idea is only as good as it's ability to function. This is achieved by our cutting edge capabilities in manufacturing metal, plastic and wood. Whether the material needs to be punched, bent, laser cut, powder coated or injection molded, our fully automated cells operate 24/7 to get the job done. And whether you need 1 or 100.000 products, from A to Z we can reduce lead times.

Meanwhile, all our services, products and factories comply to all international safety, mechanical, electrical and environmental standards. This way you can be sure we will have your design delivered safe and sound in no-time.

## Integrated Solutions

**Expect added value to your store**

This is where it all comes together. Whether you're opening, maintaining or remodeling your store-environment, we can help you do it quicker, better and more efficient. With integrated solutions we bundle our expertise in design, manufacturing and logistics and turn it into value added turn-key systems. We are your one-stop provider of unique services and products that integrate seamlessly into any environment and will exceed your expectations.

## Global Coverage

**Connect with us anytime, anywhere**

Our reach is far and wide. With offices and distribution centers in the US, Europe, Asia and Australia, we've got you covered. This way we can reduce lead times, so you can have your design supplied and delivered within no-time. Meanwhile, we will get you all the support you need. We speak your language, ask the right questions and gain insight from your perspective. This way we cut to the core of your needs.

# Ingenuity applied

**Boston Group provides total solutions to energize environments, protect assets and support unique shopping or working experience. From initial concept to full product rollout we expertly guide the process to deliver the right solutions for your needs.**

Since 1937 we have helped our clients create retail and work environments designed to fit their needs. Our smart solutions employ our vast design skills and manufacturing capabilities - providing creative products that protect assets, supplying innovative power solutions and developing custom fixtures that address your unique needs.

## Our Markets:

- **Food and Non-Food Retail**
- **Pharmacy**
- **Convenience Store**
- **Warehouse & Distribution Centers**
- **Hardware Store**
- **Lighting Showrooms**
- **Door & Window**
- **Refrigeration OEM**

At Boston Group our team delivers true value. Give us your toughest problem and we will come up with a solution that meets your needs and budget. There is no one-size-fits-all solution, which is why we work with every client individually to ensure specification, design and manufacture results are achieved. We focus all of our capabilities on designing and building the best system to serve you.

From our design centers and production facilities in the US and Europe, we come up with smart ideas and create high-quality products. Having our own metal and plastic manufacturing facilities allows us to maintain strict quality controls, adhere to all international standards and deliver a superior product.

## Our Process:

### Assessment & Survey

Our customer centric team of engineers, customer service and account managers will take the time to meet with you and survey your environment to understand what type of asset protection, power or fixture need is required.

### Planning

Once our survey is complete we provide you with a detailed proposal for your project depending on your operational and environmental needs with layouts, BOM and a deployment plan.

### State-of-the-Art Manufacturing

An idea is only as good as its ability to function. That is where our specialized manufacturing engineers come in. They ensure whatever is designed can be made to the specifications required. This is achieved by our cutting edge metal, wood fabrication, plastic extrusion and injection molding capabilities.

### Deployment & Installation

Our expert customer service and logistics team will deploy your items when and where you need them. Boston Group's experienced staff of engineers and product management are with you every step of the way to supervise and support a seamless installation.

### Certification & Compliance

Every product we make adheres to strict third party national safety standards for mechanical, electrical and environmental compliance.

Boston Group cares about the environment. With over 10 years of being a UL Environment Certified company (the only bumper manufacturer with this certification), we are proud to have placed great emphasis on incorporating recycled material in our product design and manufacture. We are pleased we can report a 15% increase in our year over year usage of post consumer, post industrial content.

# It's all in the details

**Let our design, engineering and manufacturing experts help invigorate your environment**

Boston Group, founded in 1937, offers the very latest in design and manufacturing to turn your projects around quickly from concept to finished solutions.

## Integrated Solutions Philosophy

Boston Group designs and manufactures fixtures that bundle a variety of core materials (metal, wood, plastic, power, lighting and technology) into a modular design that allows seamless integration into any environment. Ingenuity Applied!

### **Cutting edge capabilities**

To stay competitive, Boston Group continuously invests in its manufacturing capabilities to provide value driven solutions, quickly and efficiently.

### **Insight and thoughtfulness**

Our people make it all happen. To make a project viable, we formulate cross-functional teams comprising of account managers, designers, purchasers manufacturing engineers and customers service support.

### **Experience with energy**

The philosophy of Boston Group is to generate true value for our customers. We take time to understand your goals and objectives and apply our extensive experience to create configurable and scalable solutions for your environment.

## Challenge us...

At Boston Group, we love a good challenge. We strive to learn and push boundaries, so give us your toughest problem and we'll come up with a solution that meets your needs and budget.

Power Poles

**Power Poles**

Boston Group offers a wide range of PowerPole product solutions that fulfill any power/voice and data distribution needs with UL compliant, reliable 'plug & play' connectors.

#### Maximize Customer Satisfaction:

Our stylish and functional counters and checkout areas enhance the shopping experience, allowing for a seamless flow of customers. Well-designed fixtures reduce wait times and improve service efficiency, resulting in happier customers and increased loyalty.

#### Enhance Security and Reduce Loss:

Our state-of-the-art asset protection and loss prevention products safeguard your inventory and mitigate theft. By implementing our solutions, convenience stores can significantly reduce shrinkage, leading to improved profit margins and protecting your bottom line.

#### Versatile and Customizable Solutions:

Our fixtures are designed to adapt to the unique layout and branding of your stores. With customizable options, we ensure that your convenience store stands out while effectively utilizing space for optimal product visibility and sales.

#### Durable and Cost-Effective:

Crafted from high-quality materials, our fixtures are built to last. Investing in our durable products means fewer replacements, lower maintenance costs, and greater long-term value for your stores.

#### Compliant and Reliable:

Our solutions meet all industry standards for safety and functionality. By choosing our products, you can trust that you're equipping your stores with reliable solutions that comply with regulations and provide peace of mind.

#### Expert Support and Partnership:

We don't just sell products; we build long-term partnerships. Our team offers expert advice, installation support, and ongoing service to ensure that your stores operate at their highest potential.

## Service Desks and Admin Work/Pack Stations

### Modular Workstations Built for Performance and Flexibility

Boston Group's Service Desks are designed to meet the evolving needs of warehouse environments. Our desks and cabinets offer a seamless blend of durability, adaptability, and integrated technology. More than just furniture—our solutions are smart and scalable to support your team and streamline your operations.

- **Modular Design**

Easily configurable to fit any space or workflow.

- **Durable Materials**

Built to last in high-traffic environments, using robust materials that resist wear and tear.

- **Sustainable & Stylish**

Available in a wide range of colors and finishes, with components that are 100% recyclable.

## Fixed and Rolling Tables Built for the Demands of Modern Warehousing

### High-performance tables and workstations engineered for the fast-paced environments of warehouses and distribution centers.

Whether you need fixed tables for stability and heavy-duty tasks or rolling tables for flexible, mobile workflows — we've got you covered.

- **Durable Construction**

Built to withstand daily wear and tear in high-traffic industrial settings.

- **Customizable Options**

Choose from a variety of sizes, surfaces, and configurations to meet your exact needs.

- **Mobility When You Need It**

Our rolling tables offer smooth maneuverability without compromising strength.

- **Ergonomic Design**

Improve worker comfort and productivity with thoughtfully designed work surface.

### VersaPanel®

Boston's VersaPanel® is a versatile merchandising system that powers and displays lighting fixtures. Standard or custom finished face plates include the possibility for power access every 5 cm (2"), both horizontally and vertically:

- Merchandise more in less space. Higher density displays leave more room for merchandise and graphic communications.
- Create a unique selling environment. Free-standing, suspended, wall, pallet racking & gondola platform options.
- Wide range of standard accessories with unlimited possibilities. Integrate duplex outlets, shelving, hooks, graphics and more to display product in their best light.

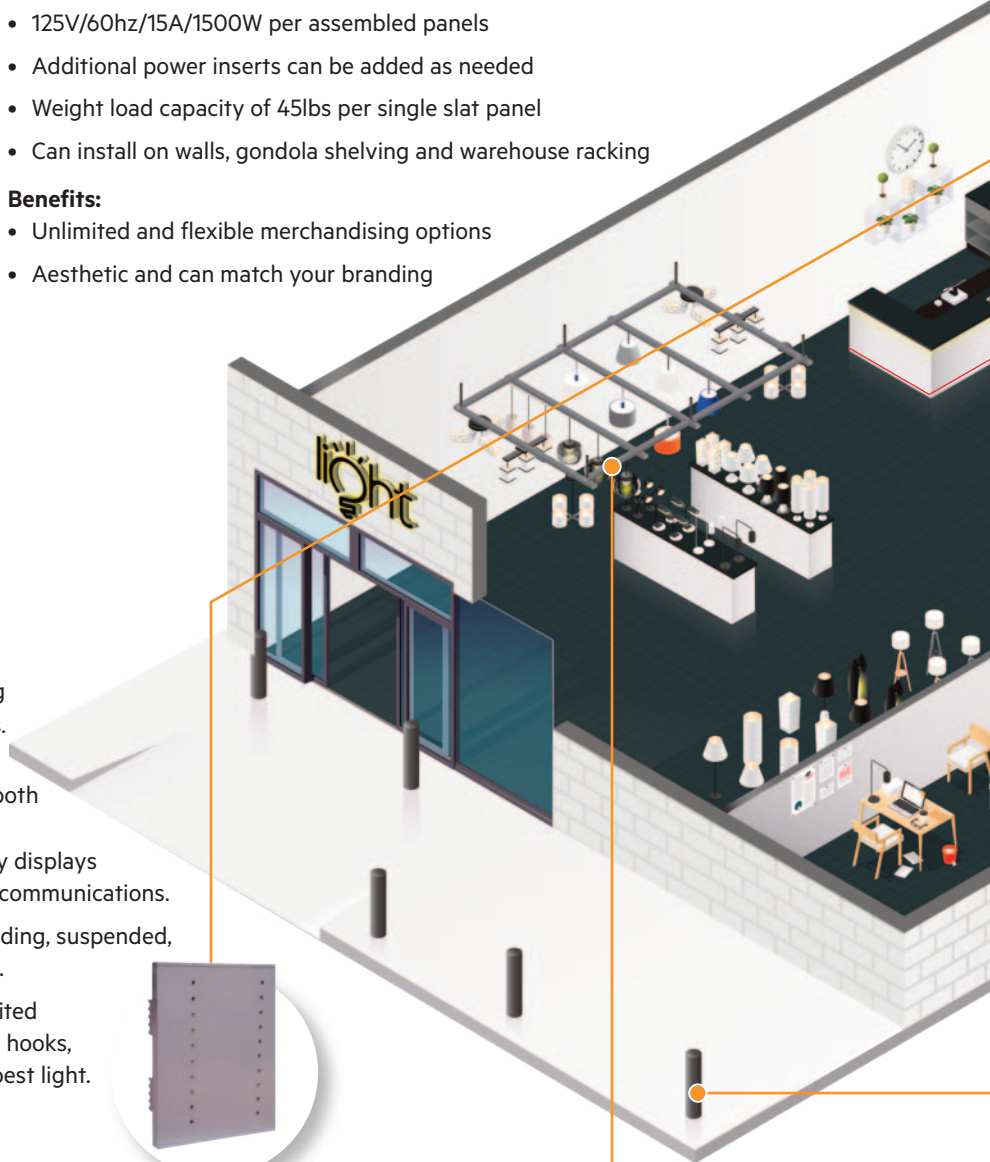

### VersaTrack

#### Features:

- Track construction allows variable display height
- Simple and safe plug n play design
- Durable construction and economical
- Can be powder coated in any color
- 125V/60hz/15A/1500W per assembled panels
- Additional power inserts can be added as needed
- Weight load capacity of 45lbs per single slat panel
- Can install on walls, gondola shelving and warehouse racking

#### Benefits:

- Unlimited and flexible merchandising options
- Aesthetic and can match your branding

# Door + Window Extrusions

## Better Quality, Performance and Choice

Boston Group's impressive and extensive inventory of Door and Window shapes/profiles allows reliable and rapid response to customer requirements. In addition, our Design Engineers utilize the latest developments in CAD/CAM technology to create designs for a broad range of unique extrusions.

Boston Group offers a wide array of extrusions to seal and insulate doors and windows from external elements and for structural support. Our material versatility includes Rigid and Flexible PVC, Santoprene, ABS, TPR and TPE.

Although our standard colors in Door and Window applications are black, almond, dark brown, and white, Boston Group offers a broad range of custom colors. By means of precise spectropho-

tometer color matching, we can match and produce virtually any color. Custom colors are retained permanently in our color inventory, so color consistency is guaranteed every time.

We maintain over 10,000 Door and Window die profiles. The availability of this inventory allows for a more rapid response to customer requirements by avoiding time delays in development and reducing the cost of die profiles.

Our impressive range of extrusion options are produced at the company's state-of-the-art facility in Ohio.

**Our reputation ensures superior quality stock and custom products tailored to the specific requirements of our customer – all delivered on time and on budget.**

TO APPLICATION

A wide range of colors, styles, and profiles ensures the look is right, but it's the high strength, durable compounds used in the extrusion process that offer the maximum protection against damage. Produced at the state-of-the-art facility in Ohio, these "bumpers" offer OEMs an impressive range of options for protecting vulnerable areas.

### Assessment & Survey

Our customer centric team of engineers, customer service and account managers will take the time to understand what type of asset protection is required.

### Planning

Upon completion of your needs assessment, Boston Group will provide you with:

- A detailed proposal for the right profile and placement depending on your operational and environmental needs.

- A deployment plan ensuring deliverables are clear and time tables are maintained.

### Production & Manufacturing

We are the original manufacturer. In fact, we invented the category of retail asset protection with the Boston Bumper! Come visit any one of our manufacturing facilities and see how we make our bumpers, end-caps, rails and corner guards. Our doors are always open!

### Certification & Compliance

Every product we make adheres to strict third party national standards for mechanical, electrical and environmental compliance.

Stand out from the crowd

# Fixture

Today's customer seeks a unique shopping experience and superb service. We can create your desired environment with our durable and flexible fixtures.

FIXTURE

# Ingenuity applied means finding you the best possible product

## Fixtures Applied at a Major Retailer

**Flexible pharmacy & quicker deployment**

Our client is a grocery, bakery, cheese shop, dry-cleaners, deli and full service pharmacy in one, with over 400 stores in the USA and still counting. Founded in the thirties and being a family-operated company – just like us – they serve more than 5 million customers annually.

**This Major Retailer wanted** to remodel their pharmacy department to improve upon its service levels and to create a smooth experience for both its customers and associates. They wanted a flexible yet durable fixture system that would fit into all their store formats.

**First, our cross-functional team** analyzed the problem and spoke to and worked together with different people in different departments. This way we got to understand their retail environment and were able to achieve improved speed and efficiency.

**We designed and developed** a modular and sustainable fixture system by bundling core elements of metal, wood, lighting, power, voice and data distribution and ensured our solution was UL and ADA compliant.

**The results?** Exactly what they had asked us for, and much more. Boston Group provided a fixture system that integrated electrical and mechanical features that shortened lead time from 8 to 4 weeks, consolidated multiple vendors and electricians and reduced overall costs.

**Now that's ingenuity applied.**

# Creative fixture solutions for any environment

**Boston Group's fixture solutions bundle a variety of materials and components to create true value. Our unique system designs can integrate metal, wood, plastic, power and lighting in a modular format that fits seamlessly into any environment. Standard or custom, Boston Group has the ability to offer the right fixture to fill any need. That's Ingenuity Applied.**

Since 1937, we have been designing and manufacturing smart and cost-effective fixtures for all sorts of commercial environments, ranging from supermarkets and pharmacies to health care facilities and production sites.

Working with the best materials and latest technologies and relying on our craftsmanship and experience, we offer a custom solution for every commercial setting. Whatever you have in mind, we know how to make it special. With ingenuity and teamwork, we bring your ideas to life.

## Design, Simulation and Prototyping

See your ideas come to life before anything is built. Our advanced simulation software allows you to view your design in isolation or within a larger environment, in any color or finish and from any angle. We can prototype anything with our meticulous metal and plastic machinery, which can produce 1 to 1,000,000,000+ high precision products. This makes product development accurate, fast and efficient.

## Production & Manufacturing

Boston Group employs fully automated manufacturing cells that punch, bend, form and laser-cut to exact specifications, bridging concept to final product release. Our fully automated cells operate 24/7 and we can reduce lead times no matter how many products your project requires.

## Deployment & Installation

Our expert customer service and logistics team will deploy your items when and where you need them.

Boston Group's experienced staff of engineers and product management are with you every step of the way to supervise and support a seamless installation. Our global coverage includes offices and distribution centers in the US, Europe, Asia and Australia to supply worldwide support.

## Certification & Compliance

Every product we make adheres to strict third party national safety standards for mechanical, electrical and environmental compliance.

# It's all in the details

**Let our design, engineering and manufacturing experts help invigorate your environment**

Boston Group, founded in 1937, offers the very latest in design and manufacturing to turn your projects around quickly from concept to finished solutions.

## Integrated Solutions Philosophy

Boston Group designs and manufactures fixtures that bundle a variety of core materials (metal, wood, plastic, power, lighting and technology) into a modular design that allows seamless integration into any environment. Ingenuity Applied!

### **Cutting edge capabilities**

To stay competitive, Boston Group continuously invests in it's manufacturing capabilities to provide value driven solutions, quickly and efficiently.

### **Insight and thoughtfulness**

Our people make it all happen. To make a project viable, we formulate cross-functional teams comprising of account managers, designers, purchasers manufacturing engineers and customers service support.

### **Experience with energy**

The philosophy of Boston Group is to generate true value for our customers. We take time to understand your goals and objectives and apply our extensive experience to create configurable and scalable solutions for your environment.

## Challenge us...

At Boston Group, we love a good challenge. We strive to learn and push boundaries, so give us your toughest problem and we'll come up with a solution that meets your needs and budget.

# LOSS PREVENTION

Boston Group Security Systems for retailers provide several features and benefits that enhance safety, deter crime, and protect assets.

Retail theft is a major problem for businesses of all sizes. According to a July 2024 report from the Council on Criminal Justice (CCJ), shoplifting increased 24% in the first half of the year in 23 cities, even while other types of crime decreased. In response to these challenges, retailers are turning to anti-theft technology, such as merchandise display solutions without significantly compromising the customer experience.

# LOSS PREVENTION

Boston Group Security Systems for retailers provide several features and benefits that enhance safety, deter crime, and protect assets.

Here are some key features and benefits:

## Features:

### Robust Construction

- Made from durable and sustainable materials; steel, aluminum, and plexiglass.
- Optional multi-point locking systems for added security.

### Impact Resistance

- Built to resist and deter forced entry attempts.

### Visibility

- Incorporate clear or translucent materials for product visibility without compromising security.

### Customization

- Can be tailored to fit specific sizes and aesthetic requirements.
- Options available for branding and matching store design standards.

## Benefits:

### Enhanced Security:

- Deters theft, vandalism, and unauthorized access.
- Protects valuable merchandise and store assets.

### Safety for Staff and Customers:

- Provides a secure environment, reducing the risk of harm during criminal incidents.
- Peace of mind for employees and customers.

### Loss Prevention:

- Reduces the risk of inventory shrinkage due to theft.
- Potentially lower insurance premiums due to improved security measures.

### Compliance:

- Meets legal and insurance requirements for retail security.
- Adherence to fire and safety regulations.

### Deterrence:

- Visible security measures discourage potential criminals from targeting the store.
- Enhanced reputation as a safe and secure retailer.

### Operational Efficiency:

- Reduces the need for additional security personnel.
- Streamlines access for authorized personnel through advanced locking and access systems.

PROTECT

By investing in Boston Group security gates, retailers can significantly enhance their overall security posture, protect their investments, and provide a safer shopping experience for their customers.

# PowerTrack™ Pods

Overhead Rack/Bay, Light & Fan Clouds

## Features and Benefits

- 16 gauge steel frame construction.
- 12" and 18" on center receptacle spacing for maximum merchandising density.
- 120V, 20A rated assemblies.
- Over 150 powder coated color choices.
- Combine different filler panel options to blend with your merchandising scheme.
- Assembly options include up to 8 tracks.

## Versatile for any Display Need

- Our Track Clouds are stick built. Meaning they can be made to whatever size you require by putting together the track and the various hardware parts.
- Boston Group can supply the support beam structure as well as the cable or you can use your own.
- The wiring for the PowerTrack™ is on top of the track. There is a wiring raceway.
- The track also has outlets spaced either 12" or 18" on center.
- Attach the light fixture or ceiling fan to our Fixture Hanger and that allows you to attach the light or fan anywhere along the track. The Fixture Hanger has a cord set attached. Plug the cord set into the outlet on the track and it's powered up.

### Very Safe and Attractive

- Our PowerTrack™ system has no exposed wires.
- Using our Fixture Hangers is easy. You can then attach the light fixture or ceiling fan anywhere along the track.
- You can add items to dress up your track cloud such as a steel frame around the perimeter of the track cloud or use acrylic or steel panels in between the rows of track.
- You can also do an “open” look where you leave the space between the rows of track open.
- Boston Group has in house powder coating capabilities so we can offer our PowerTrack™ in a wide variety of colors. White, black and beige are the most popular.

### An Organized Method of Displaying

#### Hanging Lights and Ceiling Fans

- Using our PowerTrack™ System keeps your merchandise displayed in a neat and organized fashion.
- As a result, you should realize more sales.
- Because of the flexibility of the system, you can space the rows of track as close or as far apart as required.
- With your lights and fans attached to our Fixture Hangers you have the flexibility to place the product anywhere along the track where you want it.

# PowerTrack™ Pods

Overhead Rack/Bay, Light & Fan Clouds

**Application:**

Rack/Bay Mounted, Overhead

**Standard rack widths:**

87" (2 x 43" displays)

97" and 99" (2 x 48" displays)

144" (3 x 48" displays)

**Standard bay depths:**

36", 42" and 48"

Custom quoting upon request.

# VersaTrack

Gondola or warehouse racking mounted display.

**Features:**

- Track construction allows variable display height
- Simple Plug n' Play design
- Durable construction with sustainable materials
- Can be powder coated in any color
- 125V/60hz/15A/1500W per assembled panels. Additional power inserts can be added as needed.
- Weight load capacity of 45lbs per single slat panel
- Can install in all racking and shelving manufacturers

**Benefits:**

- Unlimited and flexible merchandising options
- Easy showcasing of powered fixtures
- Economical and can be recycled
- Aesthetic and can match your branding
- Simple, safe power connections
- Strong and suited to hold almost any fixture type
- All components designed and manufactured by Boston Group and trusted partners

**FIXTURE**

Embrace impact everyday

# Protect

You want to protect your assets and your customers. Our wide range of impact protection products and total solutions allow you to do so, time and time again.

# Ingenuity applied means enabling you to achieve your goals

## Protection Applied at Major Food Retailer

Complete impact protection & provided directly from the manufacturer

Our client is a growing regional supermarket chain in the southwest of the United States that began serving families back in 1964 with its first store in Olton Texas. Since then, their philosophy has been to take care of the community, their employees and their families - a philosophy we can relate to.

**This Major Food Retailer** was looking for smart solutions to protect the assets of their stores from damage caused by carts and cleaners and to improve the shopping experience of their customers. They approached us because of our extensive experience in bumpers. But even more important, they wanted to deal directly with the manufacturer instead of a reseller because of better quality, better service and more savings.

**First we surveyed** the store environment to ensure correct coverage and then developed the right logistic and support plan to help them achieve their goals. After all, impact protection is all about the details.

**Then we prescribed** the right type of protection, which was a combination of bumpers, rails and bollards. We provided a complete turn-key service, logistic and product solution.

**The result?** Our detailed and smart solutions were exactly what this Food Retailer was looking for. They saved more than 30% of their impact protection needs versus the alternative; it pays to work directly with the manufacturer. Simply expect quick delivery, product expertise and out-standing service. In short: real value.

**Now that's ingenuity applied.**

# Asset protection solutions

**Boston Group bundles its complete floor to ceiling line of asset protection products with outstanding customer service to exceed your protection needs for your environment. That's Ingenuity Applied.**

For over 80 years Boston Group has set the standard with its full line of bumpers, floor mounted crash rails and exterior protection solutions direct to stores, supply chain partners as well as healthcare and commercial environments.

Our expertise and experience in assessing asset protection needs and prescribing the correct type of manufactured products with top notch survey, service and deployment ensures you get the best quality product and value.

## Assessment & Survey

Our customer centric team of engineers, customer service and account managers will take the time to survey your store environment and traffic patterns to understand what type of asset protection is required.

## Planning

Upon completion of the survey, Boston Group will provide you with:

- A detailed proposal for the right type of protection and placement depending on your operational and environmental needs.
- A complete layout & BOM detailing correct type and placement of asset protection product
- A deployment plan ensuring deliverables are clear and time tables are maintained.

## Production & Manufacturing

We are the original manufacturer. In fact, we invented the category of retail asset protection with the Boston Bumper! Come visit our manufacturing facilities and see how we make our bumpers, end-caps, rails and corner guards. Our doors are always open!

## Deployment & Installation

Our expert customer service and logistics team will deploy your items when and where you need them. Boston Group's experienced staff of engineers and product management are with you every step of the way to supervise and support a seamless installation.

## Certification & Compliance

Every product we make adheres to strict third party national safety standards for mechanical, electrical and environmental compliance.

Boston Group cares about the environment. With over 10 years of being a UL Environment Certified company (the only bumper manufacturer with this certification), we are proud to have placed great emphasis on incorporating recycled material in our product design and manufacture. We are pleased we can report a 15% increase in our year over year usage of post consumer, post industrial content.

# It's all in the details

**Let our design, engineering and manufacturing experts help invigorate your environment**

Boston Group, founded in 1937, offers the very latest in design and manufacturing to turn your projects around quickly from concept to finished solutions.

## Integrated Solutions Philosophy

Boston Group designs and manufactures fixtures that bundle a variety of core materials (metal, wood, plastic, power, lighting and technology) into a modular design that allows seamless integration into any environment. Ingenuity Applied!

### **Cutting edge capabilities**

To stay competitive, Boston Group continuously invests in it's manufacturing capabilities to provide value driven solutions, quickly and efficiently.

### **Insight and thoughtfulness**

Our people make it all happen. To make a project viable, we formulate cross-functional teams comprising of account managers, designers, purchasers manufacturing engineers and customers service support.

### **Experience with energy**

The philosophy of Boston Group is to generate true value for our customers. We take time to understand your goals and objectives and apply our extensive experience to create configurable and scalable solutions for your environment.

## Challenge us...

At Boston Group, we love a good challenge. We strive to learn and push boundaries, so give us your toughest problem and we'll come up with a solution that meets your needs and budget.

# REFLEX BOLLARD

## Super Duty Flex Bollard and Plastic Covers

- The ultimate in Bollard protection.
- Comes with a Polyethylene plastic cover in a variety of colors.
- Inner core made of industrial strength materials for long life.
- Held down by three 5/8 inch concrete bolts.
- There is no exposed mounting hardware to get hung up on.
- Can be removed and refitted to another area easily.
- Will deflect and stop loads up to 22,000 pounds (9975 kg) of impact force.
- Incorporates a foam interior buffer that helps absorb impact to reduce deformation of the outside plastic cover.
- Has unidirectional impact resistant by design.
- Protects, walk-in freezer door hinges, entrance and exits to the back of house, access and egresses throughout the warehouse, pallet racking and columns at the front of the building
- Can be combined with other asset protection rail systems to provide an impenetrable barrier to sensitive areas.
- Heavy duty design that will last for years to come.

# BOLLARD

## Removable, Stainless Steel Bollard

- Each 10-gauge, stainless steel bollard is 100% recyclable and contains a minimum of 60% recycled content.
- The threaded, double-bolt installation eliminates costly 3-foot drilling and the use of toxic adhesives or cement.
- Removable for easy cleaning and/or replacement.
- No exposed hardware.
- Use with HIPS for a complete, high impact floor mounted protection system.

### Stainless Steel Benefits

- Contains a minimum of 60% recycled content.
- A 100% recyclable, sustainable material.
- Contributes towards LEED points; Materials & Resources: credit 4.1 and 4.2, recycled content.
- Easy to clean, durable and corrosion resistant attributes minimize replacement and maintenance costs.

# THE BOSS®

Floor Mounted Bumper System

Look around and you'll see some of the most vulnerable areas of your store: the refrigeration and display cases, shopping cart vestibules, store fronts and sliding doors. The Boss® is a floor-mounted bumper system that protects retailers from costly damage caused by motorized floor scrubbers, pallet jacks and shopping carts.

# ECOFLEX<sup>®</sup>

Minimum 80% recycled material

- Profile & base combined contain a minimum of 80% recycled content.
- Recycled content claim validated by UL Environment.
- A virgin cosmetic skin for optimum aesthetics and color flexibility.
- Engineered to easily radius curved or round surfaces.
- 100% recyclable, sustainable material.
- Does not cost a premium. Costs 1/3 less than traditional Boston Bumper<sup>®</sup>.
- Compatible with all ecoRigid<sup>®</sup> and traditional Boston Bumper<sup>®</sup> parts.
- Contributes towards LEED points; Materials & Resources: credit 4.1 and 4.2, recycled content.
- Continuous rolls of bumper cover eliminate scrap and reduce storage space requirements.
- UL-94 V-0 Fire Rating.
- Simple installation with a pre-slotted base channel.
- Highest impact resistance.
- Vast color options.

# EDGETRIM

Recyclable Flexible Display Trim

EdgeTrim is similar to T-Mold, as it installs easily, is cost-effective and provides tough impact protection for your fixtures and display cases. The difference is that Edge Trim is applied with double-sided tape, dual lock replaceable fasteners or adhesive cement. It's ideal for finishing off refrigeration end panels and table top circumferences.

MADE IN THE USA • V SEPT 2025

# Warehouse Protection

Protecting your warehouse/DC from damage

## Bollards

Your facility takes a beating everyday from pallet jacks, fork lifts and cleaning equipment. Keep your equipment, walls and corners looking good by protecting them with the stainless steel Boston Bollard.

## Floor Mounted Corner Guards

Boston manufactures this complete line of 10-gauge, brush-finished stainless steel corner guards that can withstand impact up to 4,000 lbs! For your highest-traffic areas, they'll protect your corners from the daily assault of fork lifts and pallet jacks.

## Reflex Bollard

Our super heavy duty flexible bollard that protect capital assets by deflecting and stopping industrial mobile equipment from the damage they potentially cause. Available in 2 sizes. Will deflect and stop loads up to 22,000 lbs. of impact force.

## Box Rail

Box Rail 7 and Box Rail 48 provide extreme protection. Our complete range of Box Rail products are made of all steel components that protect against the daily punishment from fork trucks, hand trucks and equipment movers.

## Dock Door Protectors

Are fork lifts damaging the loading dock doors? Our dock door protectors safeguard both the door panels when in the down position as well as the door tracks in the up position.

## Vinyl Bollard Covers

Made of heavy duty Polyethylene plastic our Bollard covers are available in a variety of sizes.

## Warehouse Rack Guards

Protect your racking with our rack guards. Made with 12-gauge steel. These guards help reduce costly damage and keep your racking uprights intact.

Boston Group

Energize your store

# Power

Simply energize your store with our plug-and-play systems. Our lighting products and modular power systems are easy to use, aesthetic and safe.

# Ingenuity applied means turning your problem into a solution

## Power applied at a Home Furnishings Store

Overhead power-grid flexible design & delivered on-time

Our client is a home furnishing retail store in the Middle East and India with over 85 stores in countries like Saudi Arabia, Bahrein, Qatar and Oman. Being in the business of making homes beautiful the stores themselves need to look elegant as well, including the ceilings.

**This Home Furnishings Store wanted** a new powered-grid solution that could support their merchandising and operational needs. The design needed to be flexible combining mechanical and electrical features that would be compliant with regional norms, all as soon as possible.

**First, we studied** their environment to understand their model, their needs and the way they wanted to use the overhead grid. By doing so, we were able to make a rather complex problem easy and developed a simple solution.

**We then proposed** several design options. Once the design was chosen, we bundled all elements and components, achieved regional compliance and tested before shipping. All of this was done within 3 months.

**The result?** We provided a solution that achieved their aesthetic and operational needs and delivered it on-time. The new overhead-powergrid solution offers a complete system maximizing efficiency, safety and speed. We even saved 4 weeks during the whole production cycle.

Now that's ingenuity applied.

# Power solutions for any environment

Simply energize your store or any commercial environment with our plug-and-play systems. Our lighting products and modular power systems are easy to use, aesthetic and safe. From creating your specific electrical plan to installation of our manufactured products, we can provide significant efficiency with your power needs.

The wide range of power distribution components allows you to connect all products from Boston Group in the easiest and most cost-effective way. All components are certified and can be connected and disconnected even under load.

## FASTLANE® Total Store 'Plug&Play' System

Boston's FastLane® modular wiring solutions are cost-effective 'Plug & Play' wiring methods that carry power and voice/data from electrical and computer patch panels to your selling floor.

Our Fastlane® wiring solutions are custom designed and configured to meet your specific needs while still allowing for a 100% functional, pre-tested modular installation. The system arrives 'as-designed' to eliminate hard wiring and 'on-the-fly design' common with traditional methods. Save installation time and labor costs with quick, reliable connections from the switch gear to point-of-use. Our total end to end solution of product and service provides power to all areas of a store: lighting/refrigeration/POS/Service areas. Currently installed in thousands of retail locations across US, Canada and Mexico.

## PowerPoles™

Boston Group offers a wide range of PowerPole product solutions that fulfill any power/voice and data distribution needs with UL compliant, reliable 'plug & play' connectors.

## PowerTrack™

Boston PowerTrack™ offers a simple solution for displaying powered fixtures. With a variety of channel lengths and receptacle spacing options, Boston PowerTrack™ can easily be configured to meet your specific display needs. Boston PowerTrack™ is the core electrical element of all Boston Wall, Rack & Gondola Mounted Lighting Displays, Clouds, and more.

## VersaPanel®

Boston's VersaPanel® is a versatile merchandising system that powers and displays lighting fixtures. Available in a variety of powder coated finishes, supporting power access every 1.97"/ 5 cm vertically. Standard and custom spacings available horizontally.

- Merchandise more in less space. Higher density displays leave more room for merchandise and graphic communications.
- Create a unique selling environment. Free-standing, suspended, wall, pallet racking & gondola platform options.
- Wide range of standard accessories with unlimited possibilities. Integrate duplex outlets, shelving, hooks, graphics and more to display product in their best light.

## Certification & Compliance

Every product we make adheres to strict third party national safety standards for mechanical, electrical and environmental compliance.

# It's all in the details

**Let our design, engineering and manufacturing experts help invigorate your environment**

Boston Group, founded in 1937, offers the very latest in design and manufacturing to turn your projects around quickly from concept to finished solutions.

## Integrated Solutions Philosophy

Boston Group designs and manufactures fixtures that bundle a variety of core materials (metal, wood, plastic, power, lighting and technology) into a modular design that allows seamless integration into any environment. Ingenuity Applied!

### Cutting edge capabilities

To stay competitive, Boston Group continuously invests in it's manufacturing capabilities to provide value driven solutions, quickly and efficiently.

### Insight and thoughtfulness

Our people make it all happen. To make a project viable, we formulate cross-functional teams comprising of account managers, designers, purchasers manufacturing engineers and customers service support.

### Experience with energy

The philosophy of Boston Group is to generate true value for our customers. We take time to understand your goals and objectives and apply our extensive experience to create configurable and scalable solutions for your environment.

## Challenge us...

At Boston Group, we love a good challenge. We strive to learn and push boundaries, so give us your toughest problem and we'll come up with a solution that meets your needs and budget.

# FastLane®

Total Store 'Plug&Play' System

Boston's FastLane® modular wiring products are cost-effective, 'Plug & Play', pre-terminated wiring solutions that distribute 20A power and CAT 5/6 telecommunications infrastructure wiring throughout your environment.

**Applying ingenuity around the world.**  
Boston Group provides total solutions to energize environments, protect assets and support unique shopping or working experience. # FastLane®

## Total Store 'Plug&Play' System

FastLane® wiring products are designed and configured to meet your needs in a pre-tested, modular installation.

The product arrives kitted, labeled and pre-tested allowing for fast and simple assembly. Saves significant on-site labor costs and meets all codes and standards.

### The FastLane Advantage

- Shortens build and remodel cycles.
- Built-to spec and configured to your layout.
- UL listed and certified as components and as a system.
- Meets all National Electric codes (NEC) and requirements.

### Eco-Features Long-Term Benefits

- Reduces on site material waste.
- Contributes to LEED certification.
- The US Green Building Council (USGBC) Innovation in Design category highlights 'Plug and Play' Office' as earning LEED points (credit 1.1-1.4 Innovation in Design category).

### Long-Term Benefits

- Relocate & Reuse. System components can be disconnected and reused as needed.
- Built in future expandability.
- Longevity and reliability due to factory manufactured components.

### Technical Specifications

Built to specification, pre-wired & pre-tested modular components. Configured for complete 'plug & play' installation. Designed for use and certified with all Boston PowerPoles™, PlugStrips and Gondola PowerStrips.

POWER

### Power Distribution

- General Purpose (GP) and Isolated Ground (IG) power circuits.
- UL listed and approved for 20A 120V branch power circuits.

# PowerTrack™

Modular, Custom-made, Certified

A strong and sturdy extruded aluminum profile combined with preassembled power wiring and components, Boston PowerTrack™ is a versatile product that meets your display needs. Combined with variety of accessories, PowerTrack™ reduces installation time and cost with a certified safe reliable solution. Boston PowerTrack™ is the core electrical element of all Boston Wall, Rack & Gondola Mounted Lighting Displays, Clouds, and more.

- 12" or 18" on center (30 cm and 45 cm) receptacle spacing for maximum merchandising density.
- Pre-tested, certified and ready to install with easy-to-follow installation instructions.
- UL and cUL listed assemblies made to high quality standards.
- 120V, 20A and 230V, 50hz, 16A rated assemblies.
- Display lights and fans up to 50 lbs (22.5 kg) each with a maximum of 100 lbs (45 kg) distributed over 6' (1.8 m).
- Larger light fixtures can be supported directly from a structural ceiling with a custom Boston design.
- PowerTrack™ can hang from ceilings, Gondola uprights and Racking.
